The Berry Bay Community Development District has put together this document to aid the residents in identifying resources and information to assist in preparing for emergencies. The information contained herein is not purported to be exhaustive or up-to-date and is only intended for general educational and information purposes and to increase overall safety awareness. It is not intended to be legal, medical, or other expert advice or services, and should not be used in place of consultation with appropriate professionals. The District does not provide emergency assistance or news updates. The District encourages residents to contact the Hillsborough County department of Emergency Management at (727) 847-8137 for up-to-date information on emergency planning, additional emergency services contact information, and emergency news.

In no event shall the District, its officers and employees be liable for any liability, loss, injury or risk which is incurred or suffered as a direct or indirect result of the use of any of the material, advice, guidance, whether based on warranty, contract, tort, or any other legal theory and whether or not the District, its officers or employees is advised of the possibility of such damages.

Inframark Community Management
Services**

January 2025

I. INTRODUCTION

This Emergency Preparedness Plan serves as a guideline for the Berry Bay Community Development District ("CDD"). The plan is developed under the direction of the Berry Bay CDD as a service to the Berry Bay community. Responsibilities of the CDD include providing and maintaining public facilities and infrastructure (i.e. roadways, landscaping, street lighting, sewer and wastewater management) whereas the HOA is effective in the management of private property (such as enforcement of deed restrictions).

A. Provide basic information concerning the residential community to include:

- 1. Name of the residential community, address, telephone number, and email address for responsible person or entity, as applicable:**

Berry Bay CDD
2005 Pan Am Circle, Suite 300
Tampa, FL 33607
Phone: (813) 994-1001
Michael Perez; District Manager
michael.perez@inframark.com

- 2. The number and type of units in the residential community:**

969 Single-family units

B. Establish the frequency with which the emergency preparedness plan information will be updated:

The Emergency Preparedness Plan information shall be updated annually and the affected residents will be informed of all relevant information on an annual basis.

II. HAZARD ANALYSIS

- ### **A. This section of the plan should describe the hazards that the residential community is vulnerable to, such as hurricanes, tornadoes, flooding, fires, and hazardous material incidents from fixed facilities or transportation accidents.**

Berry Bay, like all of west central Florida, is vulnerable to the effects of, but not limited to, hurricanes, tropical storms, storm surges, heavy winds, torrential rains which may result in hazards, i.e. flooding and flying debris. This area is also vulnerable to tornadoes, wildfires, and hazardous materials incidents.

1. **Identification of the potential storm surge flooding risk from a tropical storm or hurricane occurrence (as identified by the National Weather Service storm surge model and available from Hillsborough County Emergency Management):**

There is potential storm surge flooding risk from a tropical storm or hurricane. The community was designed to be elevated above the 100 year base flood elevation, established at the time that the community was designed, and the community stormwater ponds were designed to contain the 100 year/24 hour storm event.

2. **Proximity of the residential community to a railroad or major transportation artery (to identify possible hazardous material incidents). Contact Hillsborough County Emergency Management to determine if site is located in a vulnerability zone of an Extremely Hazardous Substance.**

Berry Bay in Hillsborough County, FL is not in close proximity to any railroad or major transportation artery. This reduces the likelihood of hazardous material incidents related to these infrastructures.

B. Residential Preparedness Programs

Identify ways people in the community can pre-plan to help one another during an emergency.

1. **Identify plans and procedures to shelter residents :**

Residents are advised to evacuate the area if so advised by the Board of County Commissioners through Hillsborough County Emergency Management.

2. **Protection of private property:**

It shall be the responsibility of each owner to secure or arrange to have secured their personal property to protect it from hurricane or any storm damage.

The main concern of the CDD will be to prevent damage to the common areas, buildings, and improvements from flying objects stored outside of a dwelling that are not properly secured.

3. **Hillsborough County Office of Emergency Management has prepared an application for the Special Needs assistance. Application is provided for residents to complete and file.**

III. HURRICANE EVACUATION AND SHELTER INFORMATION

This section identifies the procedures for increasing the residents' awareness of local hurricane evacuation and shelter information.

A. The residential hurricane evacuation and shelter information of the plan must address the following items:

1. Evacuation Routes – ALSO SEE EXHIBIT

a. Evacuate the area to I-75:

1. Start at Berry Bay: Head north on Berry Grove Blvd towards US-301 N.
2. Turn onto US-301 N: Continue on US-301 N for about 5 miles.
3. Merge onto I-75 N: Take the ramp onto I-75 N heading north towards Tampa.

This route will take you directly to I-75, which you can use to evacuate northward.

b. Evacuate if I-75 is congested:

1. Start at Berry Bay: Head north on Berry Grove Blvd towards US-301 N.
2. Turn onto US-301 N: Continue on US-301 N for about 5 miles.
3. Merge onto SR-674 E: Take the ramp onto SR-674 E (Ruskin-Berry Grove Blvd) heading east.
4. Stay on SR-674 E: Continue on SR-674 E for approximately 2 miles.
5. Turn onto US-41 N: Merge onto US-41 N (Fifth Avenue) heading north.
6. Follow US-41 N: Continue on US-41 N for about 10 miles.
7. Merge onto I-275 N: Take the ramp onto I-275 N towards Tampa.

This route will help you avoid the congestion on I-75 and still get you to a major northbound highway.

c. Evacuate the area to the Airport:

1. Start at Berry Bay: Head north on Berry Grove Blvd towards US-301 N.
2. Turn onto US-301 N: Continue on US-301 N for about 5 miles.
3. Merge onto I-75 N: Take the ramp onto I-75 N towards Tampa.
4. Stay on I-75 N: Continue on I-75 N for approximately 30 miles.
5. Exit onto SR-60 E: Take exit 6 for SR-60 E towards Brandon/Tampa.
6. Follow SR-60 E: Continue on SR-60 E for about 5 miles.
7. Merge onto I-275 N: Take the ramp onto I-275 N towards Tampa Airport.
8. Exit onto Airport Dr: Take exit 2 for Airport Dr.
9. Arrive at Tampa International Airport: Follow Airport Dr to 4100 George J Bean Pkwy**, and you'll reach Tampa International Airport.

2. Pet Evacuation Shelters:

Burnett Middle School

1010 N. Kingsway Rd.
Seffner, FL 33584
(813) 744-6745

Shields Middle School

15732 Beth Shields Way
Ruskin, FL 33573
(813) 672-5338

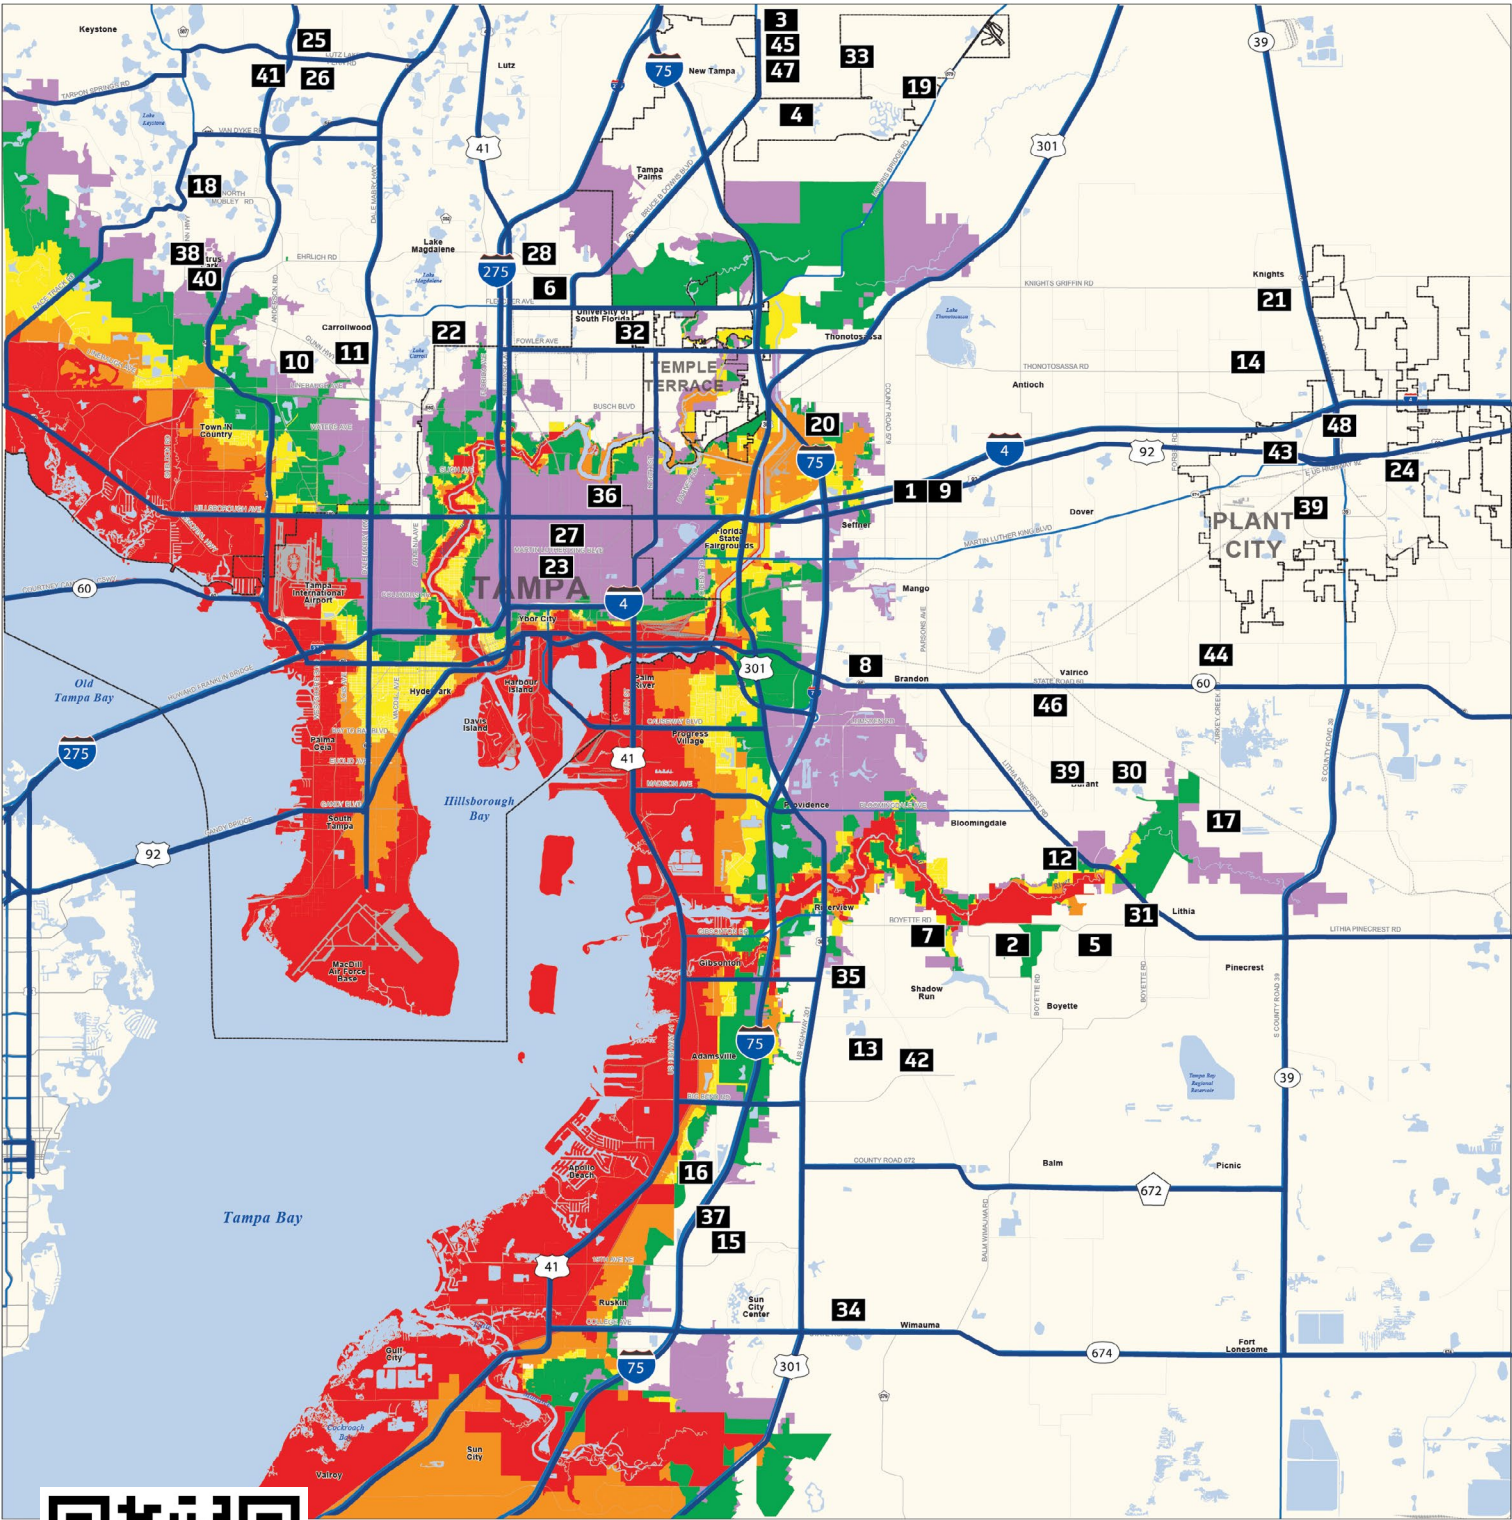

Bartels Middle School

9020 Imperial Oak Blvd.
Tampa, FL 33647
(813) 907-6801

Middleton High School

4801 N 22nd St
Tampa, FL 33610
(813) 233-3360

During an emergency, please follow Hillsborough County on social media (@HillsboroughFL) and your local news stations for up-to-date information on shelter availability.

The Saffir-Simpson Hurricane Scale

Wind Speed	Type of Damage
1 74-95 mph	Very dangerous winds will produce some damage: Well-constructed frame homes could have damage to roof, shingles, vinyl siding and gutters. Large branches of trees will snap and shallowly rooted trees may be toppled.
2 96-110 mph	Extremely dangerous winds will cause extensive damage: Well-constructed frame homes could sustain major roof and siding damage. Many shallowly rooted trees will be snapped or uprooted and block numerous roads.
3 111-129 mph	Devastating damage will occur: Well-built framed homes may incur major damage or removal of roof decking and gable ends. Many trees will be snapped or uprooted, blocking numerous roads.
130-156 mph	Catastrophic damage will occur: Well-built framed homes can sustain severe damage with loss of most of the roof structure and/or some exterior walls. Most trees will be snapped or uprooted and power poles will isolate residential areas.
4 157 mph or higher	Catastrophic damage will occur: A high percentage of framed homes will be destroyed, with total roof failure and wall collapse. Fallen trees and power poles will isolate residential areas.
